EDUCATION

International Institute of Information Technology, Bangalore **Nov 2021 – Jul 2026**
Integrated Masters of Technology in Computer Science and Engineering *CGPA - 3.82/4.00*

MENTORSHIP

Teaching Assistant **Aug 2023 – May 2025**

- **Courses:** Object-Oriented Programming in Java & C++, Linear Algebra, Fundamentals of Programming, Data Visualization, Topics in Computability and Learning.

EXPERIENCE

SWE Internship, VISA | *Software Engineering Intern* **May 2025 – Jul 2025**

- Implemented a question answering system over more than 100 code repositories.
- Leveraged a Knowledge Graph Retrieval Augmented Generation Framework to improve context relevance by 40%.
- Utilised Python, LLMs, Docker, Generative AI, and Neo4J Graph Database to build the system.

Summer Internship, IIIT-Bangalore | *Software Intern* **May 2024 – Jul 2024**

- Engineered a Retrieval-Augmented Language Model to **mitigate hallucinations by 35%** and enhance reasoning accuracy for question answering in the legal domain, specifically focusing on Intellectual Property.

PROJECTS

BulletStorm | *Python, Pygame, Object-Oriented Programming* **Jul 2022 – Aug 2022**

- Developed a platformer-style game inspired by the classic Contra, applying object-oriented programming principles like **inheritance** and **polymorphism** to accurately model and structure diverse game components.

Pathological Sample Tracker | *Java, Spring-Boot, MySQL, ReactJS* **May 2023 – Dec 2023**

- Implemented a **secure RESTful API** with authentication and authorization for **NIMHANS**, the National Institute of Mental Health and Neurosciences, to efficiently track pathlab samples across 8 different lab stations.
- Analyzed project requirements and redesigned the database schema for data management, built a robust 3-layer **Controller-Service-Repository** architecture for maintainability.

AcademiaArchive | *Java, Spring-Boot, MySQL, Docker, ReactJS* **Jul 2023 – Aug 2023**

- Designed **3 RESTful APIs** to develop a robust library management application using a **relational database**.
- Developed 8+ APIs to perform CRUD operations for user and book management, including functionalities for borrowing and returning books, ensuring secure user **authentication and authorization**.

ChatterBox | *ReactJS, NodeJS* **Jun 2024 – Jul 2024**

- Developed a robust messaging application for seamless real-time communication using Socket IO. The app is organically being used by over 50 students in IIIT B.
- Implemented user authentication and designed an intuitive user interface to enhance the user experience.

ACHIEVEMENTS

Dean's Merit List | *IIIT Bangalore* **Aug 2022 – Present**

- Awarded by Dean Academics for maintaining a CGPA of 3.6+ out of 4.0.

AFourathon 3.0 | *AFour Technologies* **Jul 2023 – Aug 2023**

- Finished as Runner Up in AFourathon 3.0, a nation-wide software development hackathon.

TECHNICAL SKILLS

Languages: Java, Python, C++, C, MySQL, OCaml, JavaScript.
Technologies and Frameworks: Spring-Boot, Tableau, NodeJS, ReactJS, Tensorflow, PyTorch, Pandas, Flask.
Tools: Git, GitHub, Linux, Milvus Vector Database, Neo4J.

LEADERSHIP AND EXTRACURRICULAR

Zense - Software Development Club | *Developer and Core Member* **Sep 2022 – May 2024**

- Led and organised 10+ sessions on **open-source**, **game development**, and **object-oriented programming** through several competitions and workshops to promote a culture of software development and open-source for over 300 students.
- **Organised an international hackathon** with over 1400 registrations and over 500 teams.

Google Developer Student Club | *Web Development Lead* **Aug 2022 – Jun 2024**

- Managed a series of 3 sessions for beginners on web development for 200 attendees.
- Coordinated 4 college-wide workshops and study groups on HTML, CSS, and JavaScript.
