EDUCATION

International Institute of Information Technology, Bangalore **Nov 2021 – Jul 2026**
Integrated Masters of Technology in Computer Science and Engineering *CGPA - 3.82/4.00*

MENTORSHIP

Teaching Assistant **Aug 2023 – Present**

- **Courses:** Object-Oriented Programming in Java & C++, Linear Algebra, Fundamentals of Programming, Data Visualization, Topics in Computability and Learning.

EXPERIENCE

Summer Internship, IIIT-Bangalore | *Summer Intern* **May 2024 – Jul 2024**

- Engineered a Retrieval-Augmented Language Model to **mitigate hallucinations by 35%** and enhance reasoning accuracy for question answering in the legal domain, specifically focusing on Intellectual Property.

Web Science Lab | *Project Intern* **Aug 2023 – Dec 2023**

- Developed petabyte-scale retrieval models for **multi-sensor data search**, focusing on retrieving semantically similar data using MongoDB and the Milvus vector database, **improved the average search time by 40%**.
- Engineered a user-friendly interface and robust backend system using Python and Flask; enhanced user engagement by 30% and reduced server response time by 25%.

PROJECTS

Pathological Sample Tracker | *Java, Spring-Boot, MySQL, ReactJS* **May 2023 – Dec 2023**

- Implemented a **secure RESTful API** with authentication and authorization for **NIMHANS**, the National Institute of Mental Health and Neurosciences, to efficiently track pathlab samples across 8 different lab stations.
- Analyzed project requirements and redesigned the database schema for data management, built a robust 3-layer **Controller-Service-Repository** architecture for maintainability.

VirtualBazaar | C, System Calls, File Locking **Apr 2023 – May 2023**

- Developed a client-server application to simulate an online e-commerce platform. Features include customer authentication, product browsing, adding products to cart, checkout and order placement.

ChatterBox | *ReactJS, NodeJS* **Jun 2024 – Jul 2024**

- Developed a robust messaging application for seamless real-time communication using Socket IO.
- Implemented user authentication and designed an intuitive user interface to enhance the user experience.

BulletStorm | *Python, Pygame, Object-Oriented Programming* **Jul 2022 – Aug 2022**

- Developed a platformer-style game inspired by the classic Contra, applying object-oriented programming principles like **inheritance** and **polymorphism** to accurately model and structure diverse game components.

ACHIEVEMENTS

Dean's Merit List | *IIIT Bangalore* **Aug 2022 – Present**

- Awarded by Dean Academics for maintaining a CGPA of 3.6+ out of 4.0.

AFourathon 3.0 | *AFour Technologies* **Jul 2023 – Aug 2023**

- Runner Up in AFourathon 3.0, a nation-wide software development hackathon.

TECHNICAL SKILLS

Languages: Java, Python, C++, C, MySQL, OCaml, JavaScript.
Technologies and Frameworks: Spring-Boot, Tableau, NodeJS, ReactJS, Tensorflow, PyTorch, Pandas, Flask.
Tools: Git, GitHub, Linux, Milvus Vector Database.

LEADERSHIP AND EXTRACURRICULAR

Zense - Software Development Club | *Developer and Core Member* **Sep 2022 – May 2024**

- Led and organised sessions on **open-source**, **game development**, and **object-oriented programming** through several competitions and workshops to promote a culture of software development and open-source for over 300 students.
- **Organised an international hackathon** with over 1400 registrations.

Google Developer Student Club | *Web Development Lead* **Aug 2022 – Jun 2024**

- Managed a series of 3 sessions for beginners on web development for 200 attendees.
- Coordinated college-wide workshops and study groups on HTML, CSS, and JavaScript.
